VIII INTERNATIONAL ANNUAL SUMMER COURSE
UPDATES IN NEUROSUGERY

Ancona – Grottammare, 3-5 luglio 2019

Honorary President: Massimo Scerrati
Course Directors: Maurizio Iacoangeli, Mauro Dobran

PRELIMINARY PROGRAM
The course is dedicated to residents and young neurosurgeons (<40 years) with the aim of keeping knowledge and updating alive and steady on the progress and future perspectives of a complex and fascinating discipline such as neurosurgery. At the same time, it wants to be a valuable opportunity to debate, exchange experiences by an open and constructive confrontation with the leading experts in the field, through a simple, direct and informal face to face relationship between teachers and participants. This is why, we try to have an almost equal number between faculty (around 15) and attendees (around 20).

The Faculty include prestigious Italian and foreign colleagues, with whom a fruitful relationship of collaboration and consolidated friendship has been ongoing for years. The topics of the course will cyclically cover updates on the main areas of neurosurgery, this year with particular reference to: Neuroradiology and Skull Base Surgery, Neurotraumatology, Spinal Neurosurgery, Surgical Anatomy and Video Session. The format of each session is structured in introductive lectures, open discussion and small group discussion, a final summary lesson and take home message.

Provisional Faculty

Siviero Agazzi (Tampa, USA)
Mohammad Al-Olama (President, Emirates Society of Neurological Surgeons President, Gulf Neurosurgeons Society, Dubai, UAE)
Mario Ammirati (Lima, USA)
Francesco Biroli (Bergamo)
Paolo Cappabianca (Napoli)
Carmine M. Carapella (Roma)
Roberto Delfini (Roma)
Mauro Dobran (Ancona)
John M. Duff (Lausanne, CH)
